Semiannual Program Review and Facility Inspection Checklist

About the checklist

The Semiannual Program Review and Facility Inspection Checklist is provided to assist institutions in conducting their semiannual reviews of programs and facilities for the care and use of animals. The Public Health Service (PHS) Policy on Humane Care and Use of Laboratory Animals (Policy), section IV.B.1.-2., requires the Institutional Animal Care and Use Committee (IACUC) to review the institution's program for humane care and use of animals and inspect all of the institution's animal facilities at least once every 6 months using the Guide for the Care and Use of Laboratory Animals: Eighth Edition (Guide) as a basis for evaluation.

How to use the checklist

This checklist is a tool to assist IACUCs in conducting thorough semiannual reviews. IACUCs are not required to use this checklist but are encouraged to amend it as necessary to reflect institutional programs and needs, or to develop their own checklist. If the checklist is modified, periodic review of the checklist is recommended to ensure relevant topics are considered as the animal care and use program changes.

The checklist covers the major topics of the *Guide* and the requirements of the PHS Policy. The checklist does not replace the *Guide*, but should be utilized in conjunction with the *Guide*. The *Guide* provides the standards, recommendations, and descriptions of desired outcomes necessary to evaluate and inspect an animal care and use program. Relevant references for the *Guide* and the PHS Policy are noted. Endnotes are included to reference specific U.S. Department of Agriculture (USDA) regulatory requirements that differ from the PHS Policy. A column to identify changes that have occurred in the institution's program for animal care and use (PHS Policy <u>IV.A.1.a.-i.</u>) since the last review is also included.

It is recommended that the Program Review section be completed during an IACUC meeting. Because physical aspects of a program require visual observation to evaluate, it is recommended that the Facility Inspection section be completed during an inspection of the facilities, including satellite facilities.

A table, "Semiannual Program Review and Facility Inspection Deficiencies," is provided as a format for the IACUC to organize and track information regarding deficiencies and plans and schedules for correction. IACUCs may choose to attach the table to the Semiannual Report to the Institutional Official (IO), but it is not a substitute for the Semiannual Report to the IO. For more information about the Semiannual Report to the IO and to obtain a sample document, visit here.

Questions or comments?

Suggestions or comments about this checklist should be e-mailed to: glawdpe@mail.nih.gov.

A new feature of this checklist is the Table of Contents, provided in entirety on the next page. The Table of Contents allows you to use Control+Click (in WORD) or Click (in PDF) to go directly to a particular section of the checklist.

I. Semiannual Program Review Checklist i

Institutional Policies and Responsibilities

Date:

1.	Ar	nimal Care and Use Program	\mathbf{A}^*	М	S	С	NA
	•	Responsibility for animal well-being is assumed by all members of the program (Guide,					
		<u>p 1</u>) [must]					
	•	IO has authority to allocate needed resources (<i>Guide</i> , p 13)					
	•	Resources necessary to manage program of veterinary care are provided (Guide, p 14)					
		[must]					
	•	Sufficient resources are available to manage the program, including training of					
		personnel in accord with regulations and the Guide (Guide, pp 11, 15)					
	•	Program needs are regularly communicated to IO by AV and/or IACUC (Guide, p 13)					
	•	Responsibilities for daily animal care and facility management are assigned to specific					
		individual(s) when a full-time veterinarian is not available on site (Guide, p 14) [must]					
	•	Inter-institutional collaborations are described in formal written agreements (Guide, p					
		15)					
	•	Written agreements address responsibilities, animal ownership, and IACUC oversight					
		(Guide, p 15)					
2.	Di	saster Planning and Emergency Preparedness	\mathbf{A}^*	М	S	C	NA
	_	Disaster plans for each facility to include satellite locations are in place (<i>Guide</i> , <u>p 35</u> , <u>p</u>					11/1
		75) [must]					
	•	Plans include provisions for euthanasia (<i>Guide</i> , <u>p 35</u>) [must]					
	•	Plans include triage plans to meet institutional and investigators' needs (<i>Guide</i> , p 35)					
	•	Plans define actions to prevent animal injury or death due to HVAC or other failures					
		(Guide, p 35)					
	•	Plans describe preservation of critical or irreplaceable animals (<i>Guide</i> , <u>p 35</u>)					
	•	Plans include essential personnel and their training (<i>Guide</i> , p 35)					
	•	Animal facility plans are approved by the institution and incorporated into overall					
		response plan (<i>Guide</i> , p 35)					
	•	Law enforcement and emergency personnel are provided a copy and integration with					
		overall plan is in place (<i>Guide</i> , p 35)					
3.	IΑ	ACUC	\mathbf{A}^*	М	S	C	NA
	•	Meets as necessary to fulfill responsibilities (Guide, p 25) [must]					
	•	IACUC Members named in protocols or with conflicts recuse themselves from protocol					
	_	decisions (<i>Guide</i> , <u>p 26</u>) [must]					
	•	Continuing IACUC oversight after initial protocol approval is in place (<i>Guide</i> , p 33)					
	•	IACUC evaluates the effectiveness of training programs (<i>Guide</i> , p 15)					
		incore evaluates and embediveness of claiming programs (earlier)					
4	ТΔ	CUC Protocol Review - Special Considerations	۸*	м	6	_	NI A
			A [™]	М	S	С	NA
	•	Humane endpoints are established for studies that involve tumor models, infectious diseases, vaccine challenge, pain modeling, trauma, production of monoclonal					
		antibodies, assessment of toxicologic effects, organ or system failure, and models of					
		cardiovascular shock (<i>Guide</i> , p 27) For pilot studies, a system to communicate with the IACHC is in place (<i>Guide</i> , p 28)					
	<u>•</u>	For pilot studies, a system to communicate with the IACUC is in place (<i>Guide</i> , <u>p 28</u>) For genetically modified animals, enhanced monitoring and reporting is in place					
	•	(Guide, p 28)					
	-	Restraint devices are justified in the animal use protocols (<i>Guide</i> , p 29) [must]					
1	-	Restraint devices are justified in the diffinal ase protocols (Odiae, p. 25) [IIIast]		1	l .	1	1

•	Alternatives to physical restraint are considered (<i>Guide</i> , <u>p 29</u>)					
•	Period of restraint is the minimum to meet scientific objectives (<i>Guide</i> , p 29)					
•	Training of animals to adapt to restraint is provided (Guide, p 29)					
•	Animals that fail to adapt are removed from study (Guide, p 29)					
•	Appropriate observation intervals of restrained animals are provided (<i>Guide</i> , p 29)					
•	Veterinary care is provided if lesions or illness result from restraint (<i>Guide</i> , p 30)					
	[must]					
•	Explanations of purpose and duration of restraint are provided to study personnel $(Guide, p 30)$					
•	Multiple surgical procedures on a single animal are justified and outcomes evaluated (<i>Guide</i> , p 30)					
•	Major versus minor surgical procedures are evaluated on a case-by-case basis (<i>Guide</i> , p 30)					
•	Multiple survival procedure justifications in non-regulated species conform to regulated species standards (<i>Guide</i> , p 30)					
•	Animals on food/fluid restriction are monitored to ensure nutritional needs are met (Guide, p 31)					
•	Body weights for food/fluid restricted animals are recorded at least weekly (<i>Guide</i> , <u>p</u> 31)					
•	Daily written records are maintained for food/fluid restricted animals (<i>Guide</i> , p 31)					
•	Pharmaceutical grade chemicals are used , when available, for animal-related					
	procedures (<i>Guide</i> , p 31)					
•	Non-pharmaceutical grade chemicals are described, justified, and approved by IACUC (<i>Guide</i> , p 31)					
•	Investigators conducting field studies know zoonotic diseases, safety issues, laws and regulations applicable in study area (<i>Guide</i> , p 32)					
•	Disposition plans are considered for species removed from the wild (Guide, p 32)					
•	Toe-clipping only used when no alternative, performed aseptically and with pain relief ($Guide$, p 75)					
. I <i>P</i>	ACUC Membership and Functions	\mathbf{A}^*	М	S	С	NA
•	IACUC is comprised of at least 5 members, appointed by CEO (PHS Policy, IV.A.3.)					
•	Members include a veterinarian, a scientist, a nonscientist, and a nonaffiliated non-lab animal user (<i>Guide</i> , p 24) ⁱⁱ					
•	IACUC authority and resources for oversight and evaluation of institution's program are provided (<i>Guide</i> , p 14)					
•	IACUC conducts semiannual evaluations of institutional animal care and use program (PHS Policy, IV.B.)					
•	Conducts semiannual inspections of institutional animal facilities (PHS Policy, <u>IV.B.</u>)					
•	IACUC organizationally reports to the Institutional Official (PHS Policy, IV.A.1.b.)					
•	Methods for reporting and investigating animal welfare concerns are in place (<i>Guide</i> , <u>p</u> 23) [must]					
•	Reviews and investigates concerns about animal care and use at institution ⁱⁱⁱ (PHS Policy, <u>IV.B.</u>)					
•	Procedures are in place for review, approval, and suspension of animal activities ^{iv} (PHS Policy, <u>IV.B.</u>)					
•	Procedures are in place for review and approval of significant changes to approved activities (PHS Policy, <u>IV.B.</u>)					
						_

6. IACUC Training

A* M S C NA

• All IACUC members should receive:

agricultural animals) (*Guide*, p 27-32)

to USDA/APHIS* (Guide, p 30) [must]

Policies are in place for special procedures (e.g., genetically modified animals, restraint, multiple survival surgery, food and fluid regulation, field investigations,

Requests for exemptions from major survival surgical procedure restrictions are made

	Francis desiration in testing the decrease (C. 14, p. 47)					
	 Formal orientation to institution's program (Guide, p 17) 					
	 Training on legislation, regulations, guidelines, and policies (Guide, p 17) 					
	 Training on how to inspect facilities and labs where animal use or housing occurs 					
	(Guide, <u>p 17</u>)					
	o Training on how to review protocols as well as evaluate the program (<i>Guide</i> , <u>p 17</u>)					
	 Ongoing training/education (Guide, <u>p 17</u>) 					
7. IA	CUC Records and Reporting Requirements ^{vi}	A *	М	S	С	NA
•	Semiannual report to the IO (PHS Policy, <u>IV.B.</u>)					
	 Submitted to IO every 6 months 					
	 Compiles program review and facility inspection(s) results (includes all program 					
	and facility deficiencies)					
	 Includes minority IACUC views 					
	 Describes IACUC-approved departures from the Guide or PHS Policy and the 					
	reasons for each departure ^{vii}					
	Distinguishes significant from minor deficiencies					
	Includes a plan and schedule for correction for each deficiency identified viii					
•	Reports to OLAW (PHS Policy, <u>IV.F.</u>)					
	Annual report to OLAW documents program changes, dates of the semiannual					
	program reviews and facility inspections and includes any minority views					
	o Promptly advises OLAW of serious/ongoing <i>Guide</i> deviations or PHS Policy					
	noncompliance (NOT-OD-05-034)					
	 Institute must promptly advise OLAW of any suspension of an animal activity by the IACUC (NOT-OD-05-034) 					
•	Reports to U.S. Department of Agriculture (USDA) or Federal funding agency ^{ix}					
	Annual report to USDA contains required information including all					
	exceptions/exemptions					
	B					
	regulations and standards					
	o Reports are filed within 15 days for failures to adhere to timetable for correction of					
	significant deficiencies					
	 Promptly reports suspensions of activities by the IACUC to USDA and any Federal 					
	funding agency					
•	Records (PHS Policy, <u>IV.E.</u>)					
	 IACUC meeting minutes and semiannual reports to the IO are maintained for 3 					
	years					
	 Records of IACUC reviews of animal activities include all required information^x 					
	o Records of IACUC reviews are maintained for 3 years after the completion of the					
	study					
. Ve	terinary Care (See also next section - Veterinary Care)	\mathbf{A}^*	М	S	С	NA
•	An arrangement for veterinarian(s) with training or experience in lab animal medicine					
	is in place including backup veterinary care ^{xi}					
•	Veterinary access to all animals is provided (Guide, p 14) [must]					
•	Direct or delegated authority is given to the veterinarian to oversee all aspects of					
	animal care and use (Guide, p 14) [must]					
•	Veterinarian provides consultation when pain and distress exceeds anticipated level in					
-	protocol (Guide, p 5) [must]					
•	Veterinarian provides consultation when interventional control is not possible (<i>Guide</i> , <u>p</u>					
•	<u>5) [must]</u>					
•	If part time /consulting veterinarian, visits meet programmatic needs (<i>Guide</i> , p 14)					
•	Regular communication occurs between veterinarian and IACUC (<i>Guide</i> , p 14)					
•	Veterinarian(s) have experience and training in species used (<i>Guide</i> , <u>p 15</u>) [must]					
•	Veterinarian(s) have experience in facility administration/management (<i>Guide</i> , <u>p 15</u>)					

	nnel Qualifications and Training	\mathbf{A}^*	М	S	С	N
	ersonnel are adequately educated, trained, and/or qualified in basic principles of ratory animal science. Personnel included: [must]					
	Veterinary/other professional staff (Guide, p 15-16)					
	IACUC members (Guide, p 17)					
	Animal care personnel (<i>Guide</i> , <u>p 16</u>)					
0	Research investigators, instructors, technicians, trainees, and students (<i>Guide</i> , pp. 16-17)					
• Con	tinuing education for program and research staff provided to ensure high quality					
	and reinforce training (<i>Guide</i> , pp 16-17)					
	ning is available prior to starting animal activity (Guide, p 17)					
	ning is documented (<i>Guide</i> , <u>p 15</u>)					
	ning program content includes: (Guide, p 17)				ı	1
	Methods for reporting concerns (Guide, p 17)					
	Humane practices of animal care (e.g., housing, husbandry, handling) ^{xii}					
	Humane practices of animal use (e.g., research procedures, use of anesthesia, ore- and post-operative care, aseptic surgical techniques, and euthanasia (<i>Guide</i> , o 17) ^{xiii}					
	Research/testing methods that minimize numbers necessary to obtain valid results (PHS Policy, IV.A.1.q.)					
0	Research/testing methods that minimize animal pain or distress (PHS Policy, IV.A.1.q.)					
0	Use of hazardous agents, including access to OSHA chemical hazard notices where applicable ($Guide$, p 20)					
	Animal care and use legislation (<i>Guide</i> , <u>p 17</u>)

	perative site (<i>Guide</i> , <u>p 145</u>)					
	urgeon Scrub: outside operating room, non-hand-operated sink (Guide, p 145)					
	Distoperative Recovery: allows adequate observation, easily cleaned, supports mysiologic functions, minimizes risk of injury (<i>Guide</i> , <u>p 145</u>)					
	ressing Area: place for personnel to change (Guide, p 145)					

A = acceptable

M = minor deficiency

S = significant deficiency (is or may be a threat to animal health or safety)
C = change in program (PHS Policy <u>IV.A.1.a.-i.</u>) (include in semiannual report to IO and in annual report to OLAW)

NA = not applicable

Special Facilities: Procedure Areas, Non-survival Surgeries, Laboratories, Rodent Surgeries, Imaging, Whole Body Irradiation, Hazardous Agent Containment, Behavioral Studies

Date: Location:

		\mathbf{A}^*	М	S	С	NA
• Ge	neral Considerations:					
0	labs used to house animals only when scientifically required and limited to					
	minimum period necessary (<i>Guide</i> , <u>p 134</u>)					
0	drug storage, control, and expiration dates (Guide, pp 115, 122)					
0	sharps disposal (Guide, p 74)					
0	anesthetic monitoring (Guide, p 120)					
0	scavenging of anesthetic gases (<i>Guide</i> , <u>p 21</u>)					
0	safety features (e.g., SOPs, safety signs, eyewash stations, secure gas cylinders)					
	are in place (Guide, p 19)					
0	carcass disposal (<i>Guide</i> , pp 73-74)					
• Ad	ditional Concerns for Survival Surgery: (rodent and minor procedures only)					
0	rodent survival surgery clean and uncluttered, not used for anything else during					
	surgery (Guide, p 144)					
0	records of peri-operative care (<i>Guide</i> , <u>p 120</u>)					
0	aseptic procedures (<i>Guide</i> , <u>pp 118-119</u>)					
0	autoclave monitoring procedures (<i>Guide</i> , <u>pp 119</u> , <u>145</u>)					
0	storage of autoclaved materials (<i>Guide</i> , <u>p 145</u>)					
0	cold sterilization procedures are appropriate (Guide, p 119)					
• Im	aging/Whole Body Irradiation:					
0	location of resource limits contamination risk (Guide, p 147)					
0	appropriate transportation methods are in place (Guide, p 147)					
0	gas anesthesia provision, scavenging and monitoring are appropriate (Guide, p					
	<u>147</u>)					
0	appropriate sensors and ventilation are provided for cryogen gases (Guide, p					
	147) [must]					
0	imaging console is located away from radiation source (Guide, p 147)					
• Ha	zardous Agent Containment:					
0	facility adheres to APHIS, USDA and CDC Select Agent Regulations and other					
	federal, state and local regulations including security measures (Guide, p 148)					
	[must]					
• Be	havioral Studies:					
0	facility minimizes airborne transmission of noise and ground-borne transmission					
	of vibration (<i>Guide</i> , <u>p 149</u>)					
0	floor coverings reduce sound transmission (Guide, p 149)					
0	testing equipment allows for surface disinfection (<i>Guide</i> , p 150)					
0	components that cannot be cleaned are not in ready contact with animals and					
	kept covered when not in use (Guide, p 150)					
0	housing areas are contiguous with testing areas when appropriate (Guide, p 150)

NA = not applicable

III. Semiannual Program Review and Facility Inspection Deficiencies

This table is provided as a format for the IACUC to organize and track information regarding deficiencies and plans and schedules for correction. This is not a substitute for the Semiannual Report to the IO. For more information about the Semiannual Report to the IO and to obtain a sample document, visit here.

IV. Endnotes

ⁱ The PHS Policy requires that Assured institutions comply with the regulations (9 CFR, Subchapter A) issued by the U.S. Department of Agriculture (USDA) under the Animal Welfare Act, as applicable. The endnotes below are specific USDA regulatory requirements that differ from or are in addition to the PHS Policy. This list is not intended to be all inclusive. For additional information please refer to 9 CFR Subchapter A - Animal Welfare.

- ii Part 2 Subpart C Research Facilities
- 2.31(b)(2) "The Committee shall be composed of a Chairman and at least two additional members;... at least one shall not be affiliated in any way with the facility...such person will provide representation for general community interests in the proper care and treatment of animals." [PHS policy requires 5 members]
- iii 2.32(c)(4) "...No facility employee, Committee member, or laboratory personnel shall be discriminated against or be subject to any reprisal for reporting violations of any regulation or standards under the Act." [USDA requirement additional to PHS Policy]
- iv 2.31(d)(5) "...shall conduct continuing reviews of activities...not less than annually." [PHS Policy requires a complete new review every 3 years utilizing all the criteria for initial review]
- ^v 2.31(d)(1)(x) "...no animal will be used in more than one major operative procedure from which it is allowed to recover unless...(it is) justified for scientific reasons...(or is) required as routine veterinary procedure...or other special circumstances as determined by the Administrator on an individual basis." [this last point is an additional USDA justification for multiple survival surgeries]
- vi 2.36 "...each reporting facility shall submit an annual report to the APHIS, AC sector supervisor for the State where the facility is located on or before December 1 of each calendar year." [The USDA annual report has a list of requirements which differ from PHS annual report]
- vii 2.36(b)(3) "...exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the IACUC. A summary of all such exceptions must be attached to the facility's annual report." [Refers to USDA annual report]
- viii 2.31(c)(3) "...Any failure to adhere to the plan and schedule that results in a significant deficiency remaining uncorrected shall be reported in writing within 15 business days by the IACUC, through the institutional official, to APHIS and any Federal agency funding that activity." [PHS Policy requires prompt reporting to OPRR of serious or continuing noncompliance with the PHS Policy or serious deviations from the provisions of the *Guide*]
- ix 2.36 "...each reporting facility shall submit an annual report to the APHIS, AC sector supervisor for the State where the facility is located on or before December 1 of each calendar year." [The USDA annual report has a list of requirements which differ from PHS annual report]
- x In addition to PHS requirements for IACUC review/application for funding, USDA regulations require: 2.31(d)(1)(ii) "The principal investigator (PI) consider alternatives to procedures that cause more than momentary or slight pain or distress to the animals, and has provided a written narrative description of the methods and sources...used to determine that alternatives were not available."
 - 2.31(d)(1)(iii) "The PI has provided written assurance that the activities do not unnecessarily duplicate previous experiments."
 - 2.31(d)(1)(iv) "Procedures that may cause more than momentary or slight pain or distress to the animals will:
 - involve in their planning, consultation with the attending veterinarian or his or her designee; [PHS Policy does not specify veterinary consultation]
 - not include paralytics without the use of anesthesia;"

- 2.31(d)(1)(x) "No animal will be used in more than one major operative procedure from which it is allowed to recover, unless justified for scientific reasons by the principal investigator, in writing..."
- xi 2.33(a)(1) "In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the research facility." [USDA requirement additional]
- xii 2.32(c) "Humane methods of animal maintenance and experimentation, including the basic needs of each species, proper handling and care for the various species of animals used by the facility, proper pre-procedural and post-procedural care of animals, and aseptic surgical methods and procedures."
- xiii 2.32(c) additional specifications include:
- "proper use of anesthetics, analgesics, and tranquilizers for any species of animals used by the facility"
- "methods whereby deficiencies in animal care and treatment are reported, including deficiencies in animal care and treatment reported by any employee of the facility..."
- "utilization of services (e.g., National Agricultural Library, National Library of Medicine) to provide information on appropriate animal care and use, alternatives to the use of live animals in research, that could prevent unintended and unnecessary duplication of research involving animals, and regarding the intent and requirements of the Act." [USDA training specifications are more detailed than PHS Policy].
- xiv 2.31(d)(iv)(C) "Procedures that may cause more than momentary or slight pain or distress to the animals will...not include the use of paralytics without anesthesia."
- ^{xv} Part 3 Subpart A 3.8 "...research facilities must develop, document, and follow an appropriate plan to provide dogs with the opportunity for exercise. In addition, the plan must be approved by the attending veterinarian. The plan must provide written standard procedures..."
- xvi Part 3 Subpart D 3.81 "...research facilities must develop, document, and follow an appropriate plan for environment enhancement adequate to promote the psychological well-being of nonhuman primates."
- xvii Part 3 Subpart A 3.6(c)(1) "Each dog housed in a primary enclosure must be provided with a minimum amount of floor space, calculated as follows: (length of dog in inches + 6)² /144 = required floor space in square feet)."
- Part 3 Subpart D 3.80 (b) "Primary enclosures [for nonhuman primates] must meet the minimum space requirements provided in this subpart."
- In situations where the USDA regulations and the *Guide* differ with respect to space requirements, the larger of the two must be followed.
