General Education

earned with AP Calculus score of

3 or higher)

General Education 2020 –21

Major:_

Student Planning

General Education courses are a required part of all BA and BS degree programs, and comprise a minimum of 44 of the 180 credit hours necessary for graduation (most students complete an average of 60 credits).

These courses help students build the foundational skills they will need for advanced study in their academic majors and assists them in developing a foundation of basic knowledge necessary for a more successful personal and professional life.

General Education and degree requirements for the Bachelor of Music (B.M.), Honors Program and Bachelor of Applied Science (BAS) degrees may be found in the WOU course catalog.

■ MTH 110 Applied College

■ MTH 111 College Algebra

☐ MTH 112 Elementary Functions

Mathematics

Completion of graduation requirements is the responsibility of the student. It is critical that students consult with their academic advisor as they select general education courses. Many majors and minors have prerequisites or suggestions for coursework.

Courses completed as part of the general education requirements may also be used to fulfill requirements within a student's major or minor program–refer to your advisor.

Transfer students who have not completed an approved transfer degree should meet with an advisor in Student Success and Advising.

General Education is a crucial component of the learning experience at Western Oregon University, providing students with fundamental skills for lifelong learning.

Students apply, communicate, and integrate ideas from a variety of disciplines. They gain abilities to think and act critically as citizens of a complex and ever-changing world.

The curriculum empowers students to pursue diverse interests and perform varying roles in their personal, social, and professional lives.
