## Oversized Turf Athletic Field Referendum

Western Oregon University is proposing a 130 yard by 100 yard synthetic, "turf" field which would be completed by early fall term, 2011. The project would include lighting so the field could be used during evening hours. The field is being proposed in order to provide playable field space year round for activities such as club sports, intramural sports, individual / group recreational activities, and limited use by athletics. The Health and Wellness Center director would have oversight responsibility of the field and utilize a student advisory board to assist in determining field use and priority. The ASWOU Student Senate will assist in the development and creation of the advisory board and initial polices.

The estimate to construct the field including lights is just under 1.5 million dollars. If this referendum is successful, a new fee, in conjunction with funds available via the Student Building Fee, would be created that would charge students $\$ 7$ per term over a 12 year term. This fee would cover the planning, design, and construction costs of the synthetic field with lights.

## The total fee for the Synthetic, "Turf" Field project would be no more than $\$ 7$ per student per term. <br> This fee would be charged to students beginning Fall term, 2011.

This fee would remain unchanged unless changed by future student action.

# Senate Resolution 1.11

49. Dr. Dukes 652
a. Health and Wellness Center update
i. 11,500 people
ii. 2,500 students
iii. Encourages people to go, it's a great addition to campus
b. Passed around sheets, ( cost and specs) on turf fields
i. Stapled sheet gives you a sense of cost associated with different stages of project
ii. 100 yard wide field would be 2 intramural football games at once on the field
A. Field Turf Company estimated 1.5 million dollars with lighting
iii. Second page is two fields
A. 2.5 million
iv. Third page 2 oversized turf and soccer
A. 3.6 million
v. Last page 2 oversized fields soccer and football
A. 4.1 million dollars
vi. My feeling is that these are conservative estimates
A. If you look at costs, right now we have the ability to mortgage half a million towards this, a quarter to the Health and Counseling project and this project
50. The First project hasn't moved forward, so it's a half million dollars towards the turf
51. Also, there may be extra money to use with the Health and Wellness Center
vii. We would shoot for one oversized fields for cost effectiveness, but the students started talking about two fields, and then athletics got into it as well
viii. Shows display of current soccer, rugby, lacrosse, softball, and football fields
ix. Want to condense and move some of the fields around
A. There has been a backing away of moving two fields
x. Convo went back to single oversized field
xi. 100 by 150 yard field
A. Master plan shows field being moved in future to have room for two fields anyways
52. A million and a half to do
53. A half million dollars mortgage
54. Four years would be around four dollars and a penny in extra fields
B. Lighting wouldn't have to be replaced, but the field after 12 years would.
55. About half a million to replace just turf if we were to get the work done now
C. Athletic use on the space
56. Does have interest in using it, particularly for soccer
57. I wouldn't want to be looking at field turf all the time if I were student government, that's why we put all of the proposed fields in one.
58. They are paired, but not limited to how its paired, we can use different combinations
59. Dual use, so they can be used by other groups on campus
60. No more Athletics only
61. If it does come down to it, Athletics would be able to use the oversized fields for a few hours exclusively
62. Yasmin: how will the project affect university for other buildings
I. Dukes: Its student fees and state funding, so it wouldn't really affect it
a. From the university, Science building is a high priority, when we go to the university system, we hope our priorities are high on their list as well, so we can get more funding for it
II. Espinoza: Who will have prioiity if there was one oversized field?
a. Dukes: Students, and Clubs, that is more of a question you would decide to answer
b. Athletics: it seems the 400 athletics would be excited to use it, even for a couple of hours
III. Pike: im looking at it like Students first and athletics is secondary
a. Athletics: if there is one field, if the athletes can have at least two hours of the field it would be great
IV. Fitzner: why would athletics need to use the field if they have their own?
a. Athletics: there is a number of schools I our conference that have turf, and it would be a competitive edge to use at that time, also for training when inclimate weather arises?
b. What happened to Health and Counseling?

- Dukes: more counseling then medical
- Also the place that we originally wanted it, the location was a residence hall in the master plan
V. Espinoza: would people be able to play games?
a. Dukes: I think we would be able to do a lot on the field, intramurals, and club sports
b. Athletics: we wouldn't play on the field
VI. Pike: when would this go into place?
a. Duke: senate would have to put it on the ballot
b. Students vote and we can start pretty quickly
c. I thought we would be able to get it done this summer instead of six months, which they are now saying
d. Will not be ready at the beginning of fall
VII. Habbermann: would this be a new fee on student bills?
a. Dukes: yes
VIII. RHA: 12 year per quarter, is that charging students for summer term?
a. Dukes: correct
IX. Espinoza: lines?
a. Dukes: we would line it as best we can, with the smallest confusion
b. Athletics: esitmates for soccer by its self = about a million dollars and just football is less than 700,000 . And that's because the field is already there
X. RHA: in the future plan, they say that its going to be moved, so wouldn't it be more cost effective to make the field in the new location?
a. Atlhetics: we would have to rebuild in 20 years anyway
XI. Yasmin: anticipating additional funding from Health and Wellness project, who decides?
a. Duke: the state and then the students
XII. Espinoza: if we jus turf the football field, couldn't the soccer players play there?
a. Athletics: the way the track is, you cant do soccer with out doing extra work
XIII. Umarger: If the football was turf, would soccer be able to use it?
a. Athletics: not as big, but doing conditioning, then definitely
b. Also allows things for pep and marching band
XIV. Duke: we are planning to go to RHA on Thursday, we are trying to get this on ballot, so we are trying to see where your feelings are with this
a. RHA: open hearings in RHA about this
XV. Habbermann: suggests a ksub-committee for a piece of legislation for next week
a. Need to be in to Pike by Friday at 5 pm
XVI. Espinoza: likes the idea of turfing one oversized field, and the football field for cost effectiveness
XVII. Kobzeff: would it be possible to have numbers, one oversized field with football, and one oversized with soccer field
a. Athletics: will send it to the plant
XVIII. Fitzer: want to address the fields for students first
a. Pike: I think that would be a good senate project for next term
- Athletics: if the athletes can have it for a little bit of the time then there is 400 yes votes right there
XIX. Habbermann: advises making a sub-committee
a. Espinoza: move to create temp committee to work on referendum for project
- Landereth: Second
- Voting: 7-0-0
XX. Dukes: looking to fund it over 30 years or 12 year cycle, you have to spell it out on the referendum
