

# Technology Updates

UTAC has received the following updates:

- UCS will upgrade 10 classrooms using CARES funding
- Michael Ellis presented about the “Real-Life Security Incident” that is now available as one of the [Information Security Training](#) modules in the WOU Portal. Employees are encouraged to complete all of these training modules to help protect our cyber security at WOU.

# Technology Accessibility Task Force

UTAC has formed a new Technology Accessibility Task Force. Given how close we are to the end of the academic year, the task force has a short duration and limited scope.

- Learn more about WOU resources, procedures, policies, and competencies related to technology accessibility
- Recommend goals related to technology accessibility to UTAC for the upcoming 2021-2022 academic year
