

Homework Grading

Each homework assignment will be worth 10 points. Two of the problems will be chosen to be graded for correctness. These problems will be worth 4 points each. The remaining two points will be awarded based on completion, neatness, and following directions.

Homework Expectations

When writing your homework assignment, keep these in mind as they will be considered in grading:

- Write legibly.
- Write your name and the assignment on the top right corner
- Be sure to label each problem attempted
- STAPLE your pages together in the top left corner (worth 1 point)
- Show all of your work, correct problems with no work will receive 0 points!
- If the questions asks you to explain something, make sure to be clear and concise.

How the questions will be graded:

0 if you don't do it or just write the answer with no work (only when appropriate)

1 if you start on the right track but just didn't get it

2 if you kind of got it

3 if you pretty much got it

4 if you got the right answer and clearly explained yourself.

A point will be given for completion, neatness, and following directions. You will not get this point if you do not do all of the assigned questions, or if the grader cannot read what you have written.

A point will be deducted if you don't staple you pages together or don't write your name on your assignment.

If you have any questions feel free to ask me.
