

Problem Solving 10.1 – In lieu of GSP

Instructions:

The questions to be answered are from the hard-cover text book, they come from the questions Exercises and Problems 10.1 starting on page 668. The questions to be answered are:

26, 30, 32, 34

Write up solutions to each question in complete sentences, using clear concise language. Your solutions should include sentences explaining, not just the solution, but how you found the solution. Each questions may have multiple parts and each part may have multiple questions, so make sure that you answer everything.

Unless you have verified with me that you have been given credit for a problem you must assume that you need to turn it in on Thursday, November 5.

Everyone one that was in class on Friday has completed Problem 26, and a few have completed problem 30.
