

Auto Space Columns to view information in a cell

When you see this:

	A	B	C	D	E
1					
2					
3					
4					
5			###		
6					
7					

Do this:

Double click the separator between the row or column, and the adjacent row or column

	A	B	C	D	E
1					
2					
3					
4					
5			###		
6					
7					
8					

Which will re-space the column or row width to accommodate the information that is in the cell:

	A	B	C	D	E	F
1						
2						
3						
4						
5			123456789			
6						
7						
8						

Voila! The Pound signs ALWAYS indicate that the Cell needs to be re-spaced. It is NEVER a Formula error!
