

## Link Excel 2007/2010 Data to a PowerPoint 2007/2010 Chart Worksheet

1. Open the Excel data file that holds the data to be charted.
2. Open the PowerPoint presentation and insert a new sheet, set in a layout that will create a chart. If this presentation has not been saved, save it now.
3. Click to activate the Chart.
4. Select the “sample data” in the Excel **Chart in Microsoft Office PowerPoint** and **delete** it all.
5. **Copy** the Excel data range that you want to chart from your Excel file.
6. Click in **A1** in Excel **Chart in Microsoft Office PowerPoint**, then click the bottom of the **Paste** icon on the **Clipboard** Group on the **Home** Ribbon. Select **Paste Link**.

You can also **[RIGHT]** mouse click in A1, select **Paste Special**, then **Paste Link**.

7. Close the **Chart in Microsoft Office PowerPoint** workbook.
8. **Close and save** the PowerPoint presentation.
9. **Close** the Excel data workbook.
