Term Paper Topic

Sedimentary history of western Oregon

TO TYLER -

LET'S FOCUS THIS

ON THE "SEDIMENTARY

HISTORY OF THE COAST

TYPE FORMATION OF

WESTERN OREGON"

I HAVE PAPERS FOR YOU TO READ SEE ME.

Subject: **paper topic and title**
To: taylors@wou.edu

Date: 02/18/11 01:34 PM
From: Skyler Edmison <sedmison09@wou.edu>

Skyler Edmison
Geo 202w

the topic i want to write about is (Groundwater issues in oregon, eastern oregon, or other specific part of the state)

My title will be..... Impact of Issues Regarding Oregon's Groundwater.

Hi Skyler - You need more focus -

I suggest "Groundwater
Resources of the
Umatilla
Basin".

This is a big
water resource
problem
area
in the
state

Plenty of resources

I chose the influence of woody debris on stream flow processes in western Oregon as my term paper topic.

Hi ELAINE -
Good topic,
I HAVE MANY
KEY
PAPERS

I suggest THIS:

1
THE EFFECTS OF WOODY DEBRIS
ON FLUVIAL PROCESSES
AND FISH HABITAT IN
WESTERN OREGON
CASCADIES

Wednesday, 16 February 2011

From: Anna Goodlove <agoodlove10@wou.edu>

Dr. Taylor,

I, Anna Lee Goodlove, could not make it to class today. It was to my understanding that topics for our term papers were due. The term paper topic i would like to research is: the **fluvial processes in western Oregon and the impact on the salmon habit.**

Thank you for your time,

Anna Lee Goodlove

Term Paper Topic

For the Term Paper I plan to write about the Pleistocene lakes that formed in the valleys of Eastern Oregon. I will be focusing on histories of Fort Rock Lake and Lake Chewaucan and the remnants that are still around. I also intend to cover how the area has changed since the last ice age and why the lakes started to dry out.

To: taylor@wou.edu

Date: 02/17/11 07:16 PM

From: Kristen Werner <kwerner09@wou.edu>

Dr Taylor

I will not be in class tomorrow- Friday. I was in bed sick all day today and the medicine I am taking makes me so drowsy. Since ES is my only class tomorrow, I am not going to risk the drive in for only one class.

Also, I would like to write about the geology of Silver Falls for my paper if it is suitable. This is almost in my backyard and I thought it would be interesting. If you agree, can you send me some journal articles or reports from your collection?

Thanks

Kristen Werner

To: taylor@wou.edu

Date: 02/20/11 02:51 PM

From: Stephen Calkin <scalkin08@wou.edu>

Dr. Taylor,

I apologize for being late with my ES202 term paper subject. I hadn't taken a look online last week and was unaware we were supposed to turn it in at class on Friday.

Anyway I found an interesting topic on your list of potential subjects: the impact of fluvial processes on salmon habitat. I was also interested in perhaps ~~doing something similar~~ for Alaskan rivers, but I don't know if finding sources would be a problem.

I'd be more than happy to bring you a typed, printed copy of the subject tomorrow before or at class if you'd like.

Thanks and again sorry for the inconvenience.

Stephen Calkin
